The Local Messenger says that the Proprietor of the Record, when he returns, if he is charged with them, (the articles in the Record) he does not know anything about them. They found their way into the columns of his paper during his absence, and he is very sorry.

I will say, that the Proprietor of the Record will stand pat on any articles, that may appear in the columns of the Record purported to come from his pen.

A Michigan boy, the son of a Baptist clergyman, has inherited all the traditional baptism-by-immersion principles, and by the close attention given to the ceremony as performed by his fond parent, is able to repeat it word for word. A few days ago he filled a tub with water in the back kitchen and catching the family cat and the two kittens proceeded to teach them one of the essential rites of the Baptist church. The kittens underwent the ordeal without protest, but the cat showed her displeasure by scratching the boy's face. Throwing the offending animal down, he said in disgust: "Damn it, then, be a Methodist if you want to!"

WAR CORRESPONDENTS.

The New York Newspapers Designed by Men Who Want to Go to the Front.

Fourteen thousand persons, it is said, make a living in this city by literary effort. Nine hundred of these are actively employed on newspapers, and every blessed one of them wants to go to the front as a war correspondent.

What a strange case this war correspondent business is! I have had 21 men, by actual count, to beg me to present their names to my editor as volunteers, for not one of them ever wrote a line for a newspaper. They are men of means, and all they care to go for is glory. They will pay their own expenses. I think some of them would give \$10,000 for the privilege of representing the Press, as it would enable them to get well up with the first gun and see the racket at a safe, close range. But editors are loyal to their men. My editor is crazy to go, and so is his youngest office boy; but somebody must remain here to run the office. Already we have the cook and the king in the field, and the rest of us are drawing straws.

There are enough war correspondents now actively engaged in the manufacture of belated news to whip the whole of Spain, and I regard it as the duty of the government to give them the best ship in the navy and let them go out to fight the armada. If this is not done we shall have a marine view of the fleet of tugs laden with correspondents interfering with the maneuvers of any Spanish warship that dares threaten.

If "Old Sagnicity" only knew this he would think three times before turning loose his flock of sparrows. It is hard enough to fight the United States navy, and when it comes down to the war correspondents—Lord!

Gen. Tecumseh Sherman had fun with the confederates down in Georgia and elsewhere, but he had to fight White-Lake Reid, war correspondent, for 20 years after. He said that Reid was the biggest liar he ever knew, and Reid said the same of him. Sherman died under a flag of truce. Gen. Hancock fought Charles A. Dana until he died. And it was pretty much the same with all the war correspondents, not because they lied, but because no two men could possibly seize things in the same light. When Spain goes against our brigade of war correspondents let her pray.

War has made the fortune of many a newspaper man. Perhaps the ablest of recent correspondents is Archibald Forbes, who "did" the Franco-Prussian war for the London Daily News. Januarius Aloysius McMichael, an Illinoisan, served the Herald in the same war, but afterward worked for the News, doing excellent service. George Augustus Sala was correspondent of the London Telegraph in our civil war, which gave him fame the world over. Frederick Palmer wrote some readable articles from Turkey and Greece, but that war didn't amount to a row of pins. The fakirs who described Port Arthur in the China-Japanese war are still taking. Cuba has been alive with fakirs. Key West has them now.—N. Y. Press.

DEEP SEA LIFE.

Purity of the Water is a Necessary Condition for Fishes at Any Depth.

Results of deep sea dredging are different in different oceans. A series of experiments made in the Aegean sea, which is a part of the Mediterranean, seems to establish the fact that there was an abundance of life in
